RE: Computerization and PROFUND® 3 Alternative

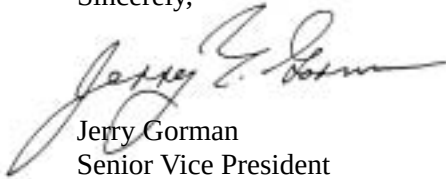

Dear ATG Member:

As you know, due to programming difficulties and the escalating cost and time for completion, ATG has been looking at alternative software sources to substitute for PROFUND® 3. We recently concluded an extensive research and testing period where we reviewed the products from the four leading title and closing software vendors. We have made great strides in developing exciting and powerful system alternatives for our members. Before progressing further, we need immediate input from you regarding your current level of computerization. Your responses are vital in helping us select the best possible solution for ATG and our members.

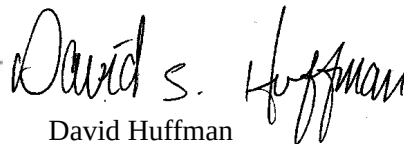

Therefore, please take a few minutes to complete the attached survey and return it to us at your earliest convenience – on or before October 30, if possible. We will make a general announcement in the near future after we have compiled this data and developed a proper solution. Thank you for your cooperation. We appreciate your patience during this time of growth and transition.

Please note that this survey was sent to ATG members via broadcast fax on September 27. If you have already completed and returned your survey, thank you. If not, we look forward to your response.

Sincerely,

Jerry Gorman
Senior Vice President
Downstate Operations
